ROSSRIVAL M. BENDILLO

SENIOR FULL-STACK DEVELOPER | TECHNICAL ARCHITECT | AI AUTOMATION

+63 967 125 2731 • camrynchelsea01@gmail.com • Gen. Lim, Orion, Bataan 2102, Philippines

PROFESSIONAL SUMMARY

Senior full-stack developer and technical architect with experience across web development, cloud deployments, automation and IT infrastructure. Hands-on with React, Next.js, TypeScript/JavaScript, REST/GraphQL APIs, AWS and Vercel, with end-to-end delivery experience from requirements and architecture through implementation, deployment and production support. Brings a systems-engineering approach to code quality, security, reliability and maintainability, alongside practical AI-assisted development and human-in-the-loop workflow design. Comfortable working across existing systems, resolving complex issues and communicating technical decisions to stakeholders.

CORE STRENGTHS

- End-to-end web product delivery and pragmatic technical decision-making
- Next.js, React, TypeScript/JavaScript and reusable component development
- REST and GraphQL integrations; server-side application patterns
- AWS Lightsail, AWS Amplify, Vercel, Git/GitHub and Linux deployments
- AI-assisted workflows using Claude, n8n and Power Automate, with approval gates
- Role-based access, multitenant systems, identity and authorization concepts
- Code troubleshooting, production support, documentation and stakeholder communication

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Noonan Real Estate
2025 – Present

- Built a full-stack website for karateinstitute.au using Next.js and Sanity headless CMS, covering frontend implementation through production delivery.
- Designed AI reasoning workflows with confidence/risk gates, edit-before-send controls, approval/block decisions and audit-oriented workflow states.
- Built n8n automation pipelines integrating AI tooling and human approval steps, including Teams-based AI/chat intelligence workflows.
- Administered Microsoft 365 and Entra identity services and managed WordPress properties including karate.org.au and noonan.com.au.

Senior Web Developer | Central One Bataan
2023 – 2024

- Led end-to-end web projects from Figma prototypes through implementation, deployment and live project management.
- Built full-stack applications using Next.js, React, TypeScript/JavaScript and headless CMS architectures.
- Configured and deployed multitenant application accounts and servers on AWS.
- Worked in Agile delivery with phased implementation, sprint execution and stakeholder reviews for projects including bj.live and citinowonlinecasino.com.

L2 3CX VoIP Engineer | Axecom Pty. Ltd.
2022 – 2023

- Provisioned and maintained multitenant AWS Lightsail servers supporting 3CX environments.
- Installed, configured and maintained 3CX systems, Raspberry Pi security/RMM nodes and related infrastructure.
- Troubleshot production communications environments and supported service reliability.

L2 MSP Support Engineer | Far Out Solutions
2021 – 2022

- Resolved escalated technical issues using ConnectWise/Autotask PSA workflows, with disciplined ticket ownership and client communication.
- Performed Xerox network-printer deployment and onsite technical support across hardware, software, networking and endpoints.

Network & NOC Engineer | Hospitality WiFi / Telna
2020 – 2021

- Configured Cisco Meraki and MikroTik infrastructure, including RADIUS gateway integrations.
- Performed NOC monitoring and Level-2 escalation for guest and employee connectivity, authentication and access issues.

Enterprise Support — Tier 1–2 | Cognizant (UBS) · Dell · Microsoft / Sutherland · Verizon / Teleperformance
2009 – 2016

- Provided enterprise technical support across operating systems, applications, networks and gateway diagnostics.
- Supported permissions, authentication, Outlook and business applications; created knowledge-base material and followed structured escalation processes.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Backend & APIs	GraphQL, REST, Next.js server-side patterns, Firebase; Python currently developing toward production backend use
Cloud & Delivery	AWS Lightsail, AWS Amplify, Vercel, Git/GitHub, Linux, Postman
Data	MySQL, MongoDB, Firebase, phpMyAdmin; relational data-modeling concepts
AI & Automation	Claude, n8n, Power Automate, workflow orchestration, human-in-the-loop approvals, confidence/risk gating
Architecture & Security	Multitenant systems, role-based architecture, centralized authorization, server-enforced security, component libraries, server-state/query-cache patterns
Identity & IT	Microsoft 365, Entra ID, authentication, endpoint/infrastructure troubleshooting, RADIUS, Cisco Meraki
Ways of Working	Agile Scrum/Kanban, phased roadmaps, stakeholder review, production support, documentation

EDUCATION

Bulacan State University — BS Computer Engineering (2001–2006)

KodeGo — Full Stack Web Development (2023)

SELECTED PORTFOLIO

karateinstitute.au — Next.js / Sanity full-stack build • bj.live — web application project • citinowonlinecasino.com — web application project • karate.org.au / noonan.com.au — WordPress management

Note: This CV highlights demonstrated experience and does not claim direct PostgreSQL production experience or formal developer-management responsibilities not substantiated in the base CV.
